What is CleanMaint?

CleanMaint™ is a cloud-based cleaning service management software. It helps you increase your defense against the spread of infections by empowering in-house teams to better manage today's more aggressive cleaning requirements and to ensure the safety and sanitization of facilities. It fully automates workflows to maximize workforce efficiency. Built on the proven eMaint CMMS system for maintenance management, CleanMaint can:

- Dynamically manage schedules and resources
- Map work orders to physical zones
- Track compliance in real time
- Control inventory of PPE and cleaning supplies
- Improve visibility into activities and work completion
- Generate custom, shareable reports

Why is a cloud-based cleaning management software needed?

Many organizations still use paper-based or spreadsheet-based systems to track their cleaning operations. But the recommended frequency and thoroughness of cleaning and sanitization tasks is increasing, requiring a tool that meets these requirements and can also scale to meet growing demand. Cleaning and sanitization are critical to maintaining safe work and educational environments. CleanMaint upgrades your operations and processes for scheduling and recording cleaning jobs, saving time and money both in work preparation and execution.

Schools, companies, and facilities of all types need rigorous cleaning services more than ever before. Are your current processes up for the challenge? CleanMaint, a web-based cleaning service management software, modernizes your sanitization scheduling and resource planning by eliminating paperwork and automating workflows.

With CleanMaint, you get an easy-to-use, cloud-based application built on an industry-leading maintenance management system. Designed for the complex world of work order management, CleanMaint delivers robust and scalable features in a configurable user interface. You can easily map your scheduling to available resources, attach cleaning procedures to job orders, and accurately track and manage cleaning supplies and PPE.

With CleanMaint, you are better prepared to safeguard the health and safety of human presence in facilities and workplaces and enable compliance with increased safety guidelines and regulations.

CleanMaint's web-based solution can be accessed on browser-based devices such as PCs, smartphones, and tablets. Every CleanMaint subscription package includes a dedicated Customer Success Manager, unlimited helpdesk support (via phone, email and live chat), daily data backup, and software updates and enhancements.

Training and support

Live product support available at your convenience. A world-class training and support organization, including:

- In-person boot camp classes
